

**RESPONSE**

Applicants request entry of this supplemental amendment in order to correct a typo in the previous response and also as it is believed to place the application in condition for allowance. The claims above show only the supplemental amendment to be made after entry of Applicants' February 5<sup>th</sup> response.

Applicants have amended claim 1 by replacing an "and" with an "or" to make it clear that component (B)(1) is the reaction product of the described acylating agent and "a polyamine, an alkanolamine, a thiol-containing amine, or a mixture thereof."

Applicants have also amended claim 1 to avoid confusion regarding component (B)(1) by removing the term "of the acylating agent and polyamine". Applicants wish to make it clear that the reaction product of (B)(1) is heterocyclic, whether it is derived from a polyamine or one of the other possible reactants. Applicants inadvertently referred to the reactant as a polyamine when the claim clearly allows for other reactants to be used. The removal of this phrase corrects this mistake and results in a readable claim.

Support for these amendments may be found in claims 2 and 16 as originally filed and also from page 3, lines 4-19 and page 7, lines 1 to 7 of the specification.

Please review the amended claims in view of the remarks and declaration submitted with Applicants' February 5<sup>th</sup> response. If the Examiner believes that only minor issues remain to be resolved, a telephone call to the Undersigned is suggested. Any required fees or any deficiency or overpayment in fees should be charged or credited to deposit account 12-2275 (The Lubrizol Corporation).

Respectfully submitted,

/Christopher D. Hilker #58,510/
